

Halting Harassment and Abuse in Sports using Learning Technologies

6th Newsletter

Partner: ASVO

(July – December 2021)

In December 2021 the ASVÖ Salzburg was participating in the meeting of "Gender Equality". All ASVÖ offices in Austria have one personal contact point for all questions around gender/ gender equality an also for problems regarding (sexual) harassment in sport. In this meeting the HALT project was picked out as a theme so we could present again the project to a wider audience. In future we will work together with all other ASVÖ offices in Austria for communicating the outputs of HALT and therefore disseminate the contents of the projects.

Four times a year ASVÖ and the two other sports umbrella organisations in Austria are preparing a newspaper supplement for "Salzburger Nachrichten" which is one of the biggest newspapers in Austria, with their own content on the subject of sports and exercise.

In the fourth edition of 2021 the HALT project was one of the articles from ASVÖ Salzburg, in which we described the project and let people know about our participation. We additionally informed about important contacts for everyone who needs help, witnessed something or just wants to know more about the topic. In addition to attaching the supplement to the newspaper, all articles are digitally spread on social media and our website.
